

I got lost in the desert.

After I found my way home,
I made an offline map app.

GeoJSONic is a free offline location journal for iPhone. Capture a note with zero bars — GPS, elevation, photos, and voice memos, all saved straight to your phone as real GeoJSON. No account, no cloud, no server ever sees it.

Share a trip the way you'd hand someone anything — phone to phone, no internet required. GeoJSONic calls it the Sneakernet.

A SINGLE CAPTURE LOOKS LIKE THIS

GPS	ELEVATION	ACCURACY
36.86915, -94.37191	312.7 m	±4.9 m
HEADING	PLACE	WEATHER
271° W	Neosho, MO	14.2°C • Partly Cloudy

Free on the App Store.

GeoJSONic Pro adds turn-by-turn navigation,
offline maps, satellite imagery, and virtual rides.
